

Many Faces of Memory Diseases

HIETAKANGAS Minna,
The Alzheimer Society of Finland

Many Faces of Memory Diseases was launched in September 2017 in Finland.

The aim of the campaign is to:

1. **GIVE** voice to the people with memory disease and their families
2. **REMIN**D that every story of memory disease is unique
3. **REDUCE** common stigmas related to memory diseases
4. **INVITE** to join the campaign by giving an encouraging example
5. **ALLOW** tools for everyone to face memory diseases wisely

The following were the first to share their stories. **Anyone and everyone can tell their own story** of living with memory disease. We wish to share hundreds of untold stories through the website.

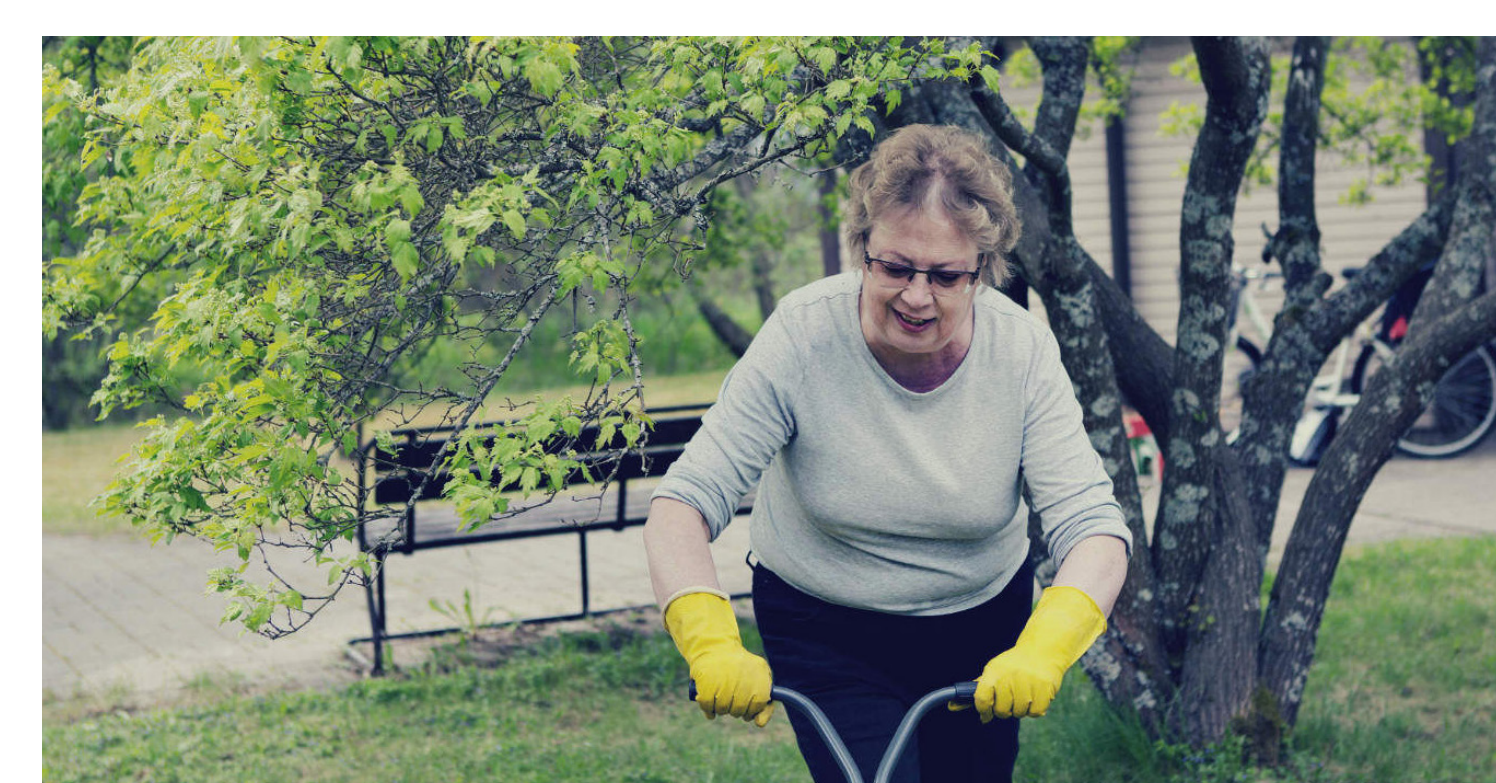

Everything is fine when I am close to her

Jouni

I encourage others by giving an example

Silja

Memory disease is quite an ordinary thing

Anne

Getting the right diagnosis was really difficult

Petri

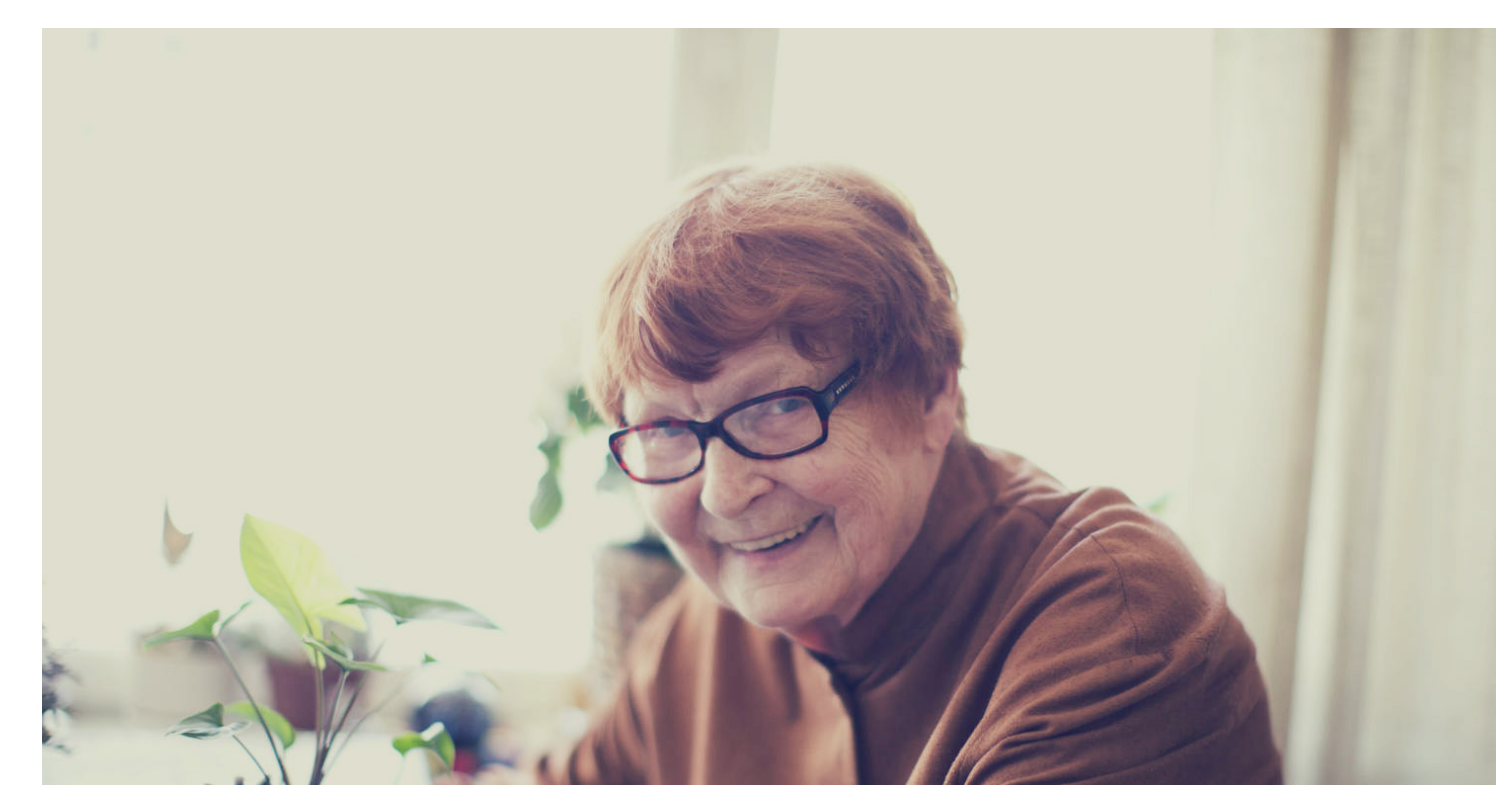

Music makes me feel relaxed

Heimo

I don't have time to get bored

Eila

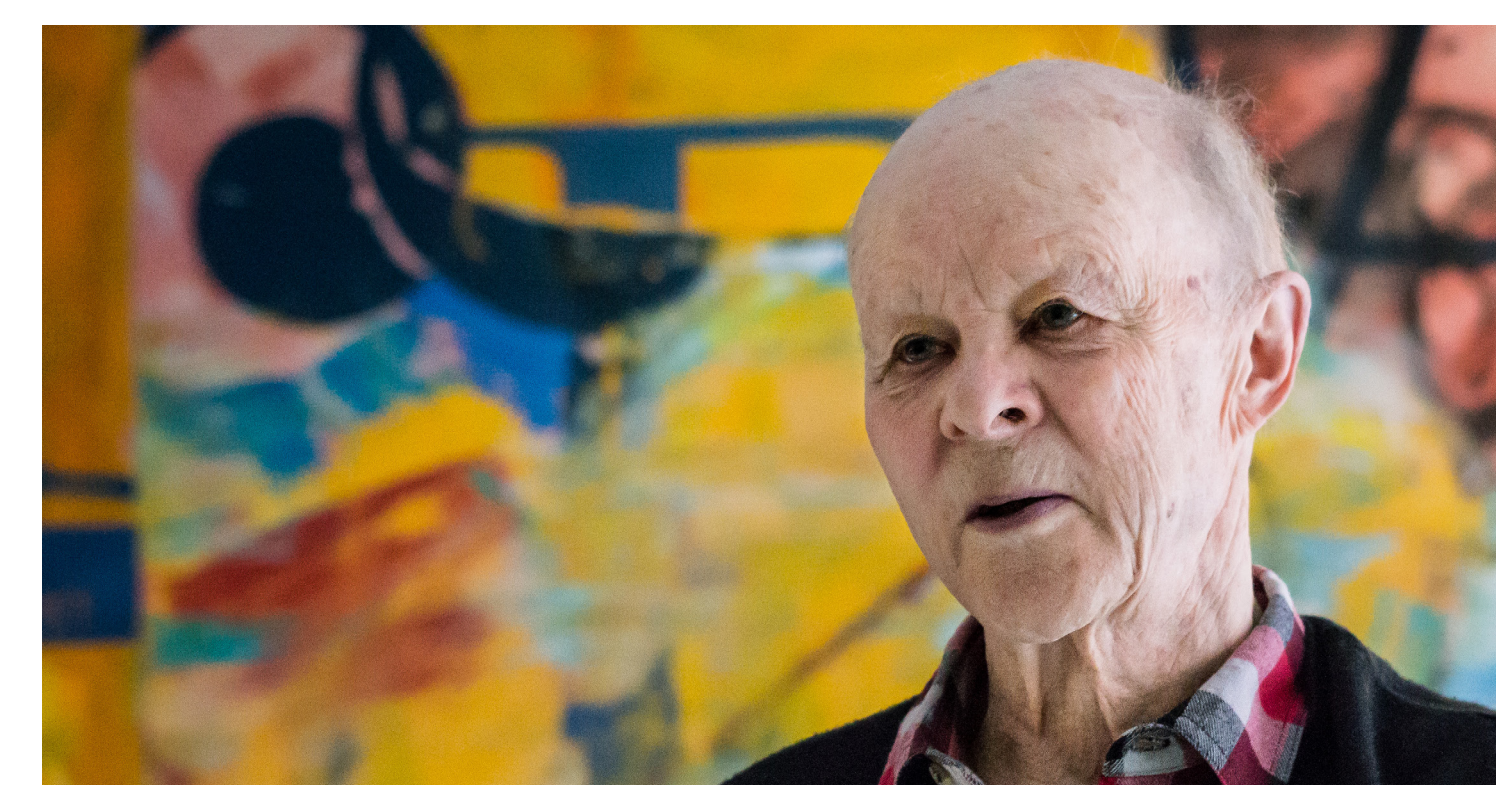

I take care of all of my father's things

Senni

I took care of my wife for 13 years

Martti

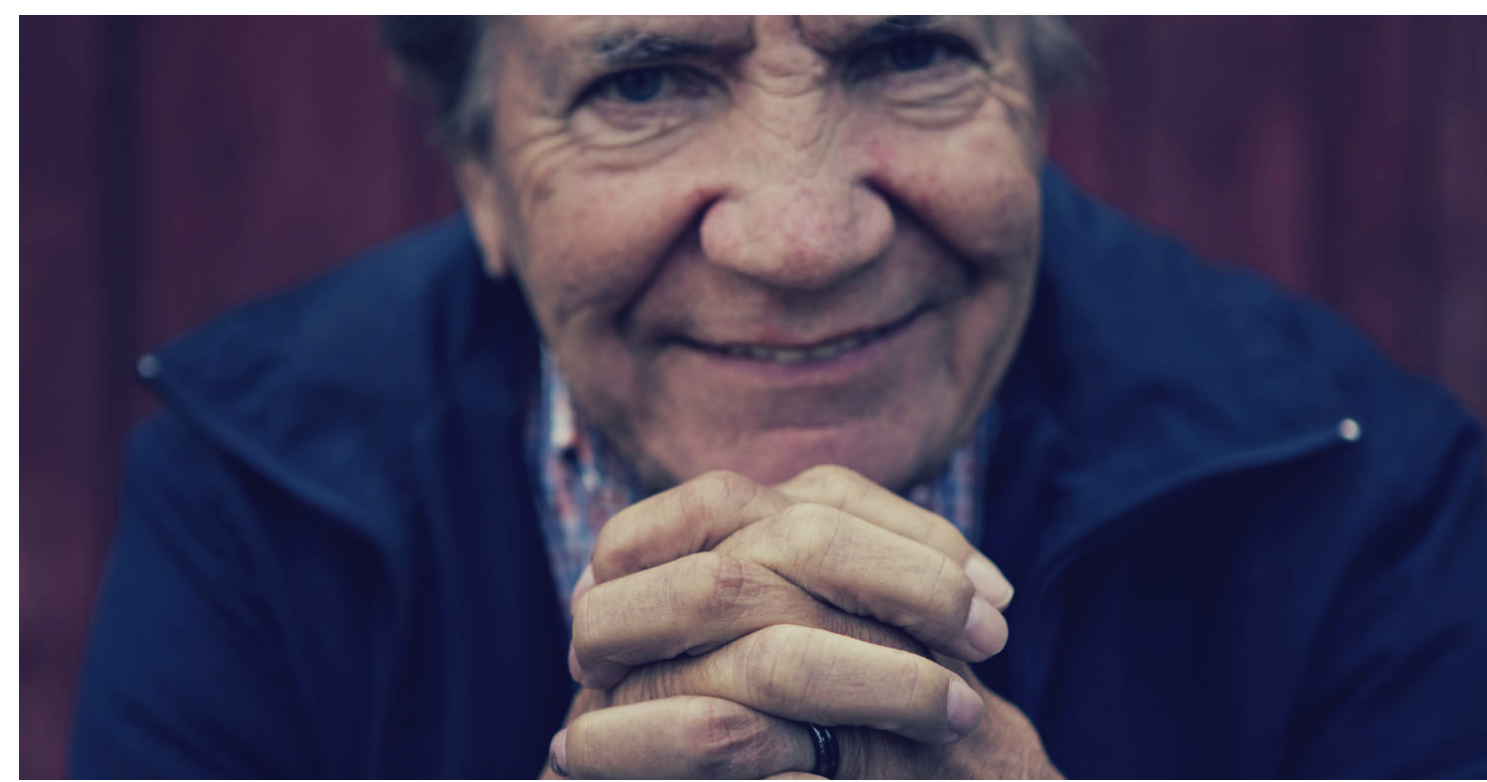

There's always someone with my mom

Sirpa

Friends and neighbours make me feel safe

Terttu

We found a really good care home

Eino

Now my dad is my inner audience

Tommi
